

Steering wheel extension

Your dealer:

Steering wheel extension

The steering wheel extension makes it possible to change the steering wheel position into the optimal way for the customer.

The steering wheel extension was developed, in order to give customers with following disabilities the opportunity to use the steering wheel:

Thalidomide, shortened or deformed arms and expansion of legroom for tall customers.

Additionally, for customers, who must lead the vehicle from a wheelchair, the

steering wheel extension can create the necessary place.

In order to the customer information is the adapter length selectable.

Possible are original steering wheels, special steering wheels are also compatible.

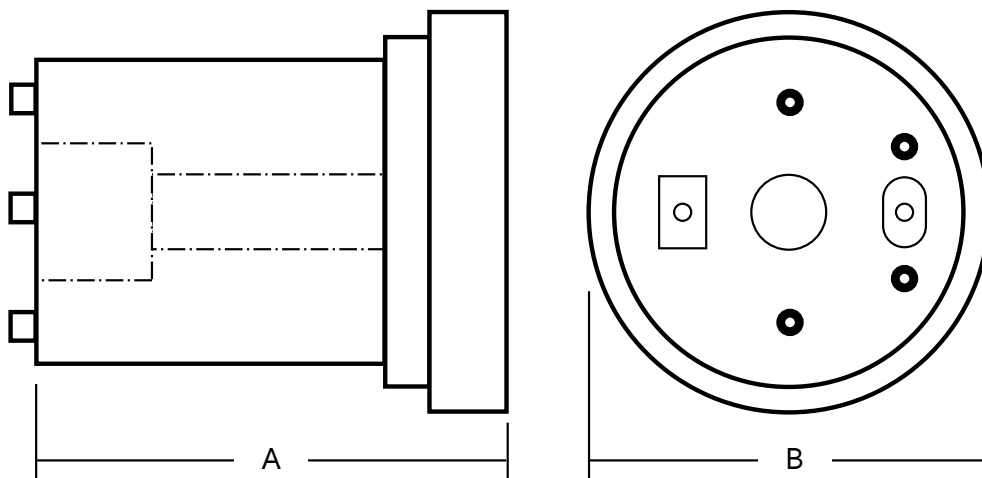

If the original steering wheel is used, all standard functions are preserved.

The steering wheel extension consists of two parts.

One part is replacing the original steering wheel. The other part, the actual extension with the original steering wheel connects the elements together.

The steering wheel extension is available for the following vehicle models:

- Mercedes Benz Vito/Viano
- Volkswagen T5

Dimensioning:

A = According to customer requirement / B = Depend on vehicle model.
